

Press release no. 2/2008

Frank Optic Products® GmbH on the
PHOTONICS EUROPE Trade Fair
Stand no. 105
Strasbourg 07.-11.03.2008

**Laser technology components and optics for
processing laser material**

NEW at the FAIR

**High power laser cables for industry
Autoclave-capable laser cables for medical
applications**

In its capacity as one of the leading OEM key suppliers for laser and medical technology in Europe, Frank Optic Products is considered to be the only company worldwide to manufacture the full product range for laser cables in all areas of performance from laser and medical technology to spectroscopy and analysis technology. No other company possesses such global know-how.

The company can be claimed to be a market trend setter with its own innovations, which may be externally cooled beam delivery systems, autoclave-capable laser cables or fibre-optic beam delivery systems with RFID technology and opto-electronic safety installations in the 10kW range for high performance lasers.

For the 1st time Frank Optic Products is presenting at the Photonics Europe in particular laser cables in all performance classes, fibre-optic medical probes, fibre and laser plugs, fibre tips and laser scalpels made of sapphire as well as laser windows, ceramic and metal laser reflectors and optical components made from quartz glass and sapphire.
